Instructions

^ COLLAPSE ^

1. Visit w3schools and go to the Java Tutorial section: <https://my-learning.w3schools.com/tutorial/java>
2. Complete the following readings
 1. Classes Lessons 11.7 - 11.14, 11.16 - 11.20, 11.22 - 11.26
 2. Java Quiz (on the tutorial page)

Guide:

1. Make sure you're in the main branch locally (`git checkout main`) and git pull origin main any pending changes
2. Make a new branch per the recommended branch name below (`git checkout -b ...`)
3. Fill in the items in the worksheet below (save as often as necessary)
4. Once finished, export the worksheet
5. Add the output file to any location of your choice in your repository folder (i.e., a Module4 folder)
6. Check that git sees it via `git status`
7. If everything is good, continue to submit
8. Track the file(s) via `git add (name_of_file)`
9. Commit the changes via `git commit -m "some summary message"` (don't forget the commit message)
10. Push the changes to GitHub via `git push origin (the_branch_name)` (don't forget to refer to the proper branch)
11. Create a pull request from the homework related branch to main (i.e., main <- "homework branch")
12. Open and complete the merge of the pull request (it should turn purple)
13. Locally checkout main and pull the latest changes (to prepare for future work)

Branch name: M4-Java-Readings

green bar on the right side shows lesson is read, covered
lessons included inheritance, polymorphism, abstraction,
enums...

Task #1: Reflect on the topics and refer to the checklist of this task

Sub Task #1: What concepts/topics were totally new to you?

Sub-Task #1: What concepts/topics were totally new to you?

≡ Task Response Prompt

Mention specific concepts/topics

Response:

A lot of these topics are newer/more complex, but most of these you have gone over in class. The stuff with enum, hashMap, hashSet, and interfaces were pretty new to me, and the hashMap stuff seemed pretty useful, its like the java equivalent to a dictionary in python.

Task #1: Reflect on the topics and refer to the checklist of this task

Sub Task #2: What concepts/topics were you already familiar with?

≡ Task Response Prompt

Mention specific concepts/topics

Response:

tops like polymorphism, inheritance, sub/super classes, and the core concepts of OOP programming I was pretty familiar with, especially the stuff you went over in class.

Task #1: Reflect on the topics and refer to the checklist of this task

Sub Task #3: What topics do you still not feel confident about? If confident, explain why.

≡ Task Response Prompt

At least a few reasonable sentences

Response:

maybe a little more review in some of the java imports like hashMap, hashSet, and java time, but I will definitely review if I end up using it for any projects in this class
